11m Blyth workcat showing at the Dubai International boat show

### Du'Blyth boatshow makes the front page

The Blyth workcat received a great welcome to Middle East region at the Dubai International boatshow in March, so much so, that we made the front page of the Gulf News.

Even though the show was a leisure boat show many enquiries for workboats in the construction, passenger, survey and dive sectors were received from all over the region. We are now working with clients to finalise general arrangements and contract specifications for around 10 new vessels. While still concentrating on home markets, the Dubai show will be the first of many international shows for Blyth who are embarking on a worldwide sales campaign. After a series of shows the vessel will go to work with her new owners who are operating in the Gulf region.

The Gulf News - coverage of DIBS 2009

Air conditioning, double glazed tinted windows and forced engine air cooling systems prove to be essential build elements, in operating temperatures up to 55 degrees Celsius.

Blyths latest delivery "Storm" proved to be the perfect tool for surveying. The 12m vessel has 3 double cabins, moonpool, hydraulic A frame, purpose made survey desks with all the latest equipment attached. Fitted with Iveco 400hp engines she made a top speed of 25 knots with cruising speeds of around 18—19 knots. With a draft of 90cm (3ft) the Blyth is perfect for inshore surveying. She is straight to work carrying out survey work in Northern Europe and the U.K for periods of up to a week. Built to both Seafish and MCA category 2 the dual classification combines the heavier lay-up schedule with an internationally recognised work boat standard. Matching crew comfort and all the necessary surveying equipment required is no problem on the Blyth 12m.
